## Turkey's Pride **Roketsan**

All eyes were set on **Roketsan** at Eurosatory, not only for the location and design of its stand but also for its wide production range to answer almost every requirement. The company was in the news for the two separate agreements concluded during the exhibition. The first deal was signed with Airbus Helicopters in the context of 2.75" laser guided missile CİRİT's integration onto H135M and H145M light armed assault helicopters. By this means, **Roketsan** seeks to increase the chances in global

market. The other agreement was signed with a German-French joint venture Junghans Defence on joint development and marketing of fuse systems. Systems to be produced under the deal will be presented to ammunition manufacturers in international markets, particularly France and Germany. Thus **Roketsan** had a lively time throughout the exhibition, hosting important delegations like French Defence Minister, Argentinian Chief of General Staff and procurement officials from Pakistan Armed Forces.
