YATAĞAN® LASER GUIDED MINIATURE MISSILE SYSTEM

YATAĞAN® Laser Guided Miniature Missile System can be fired using new generation man portable 40 mm grenade launcher and has a greater effective range than the maximum range of existing grenade launcher ammunition. Lightweight and small size missile enables integration of the system with mini unmanned aerial vehicles, ground and surface vehicles.

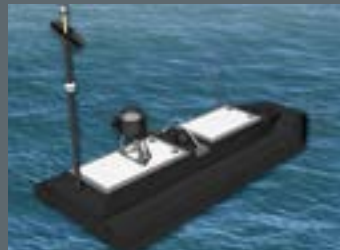

It brings precision, range and target oriented fire power to urban warfare.

Technical Specifications

Diameter	40 mm
Length	~40 cm
Weight	~1kg
Maximum Range	~1,000 m
Seeker	SAL*
Accuracy (CEP)	1m
Platforms	Grenade Launchers Mini Unmanned Aerial Vehicles Unmanned Ground Vehicles Unmanned Surface Vehicles

*SAL: Semi-Active Laser Seeker
